REMINGTON STANDARD TYPE-WRITER.

The attention of merchants, Professional men, and in fact all those who have much writing to do is called to the very great value of the Remington Type-Writer as a Time, Money and Labor-saving machine. By its use three times as much writing can be done in the same given time as with the pen, or in other words every hour spent in pen-writing is forty minutes wasted. Persons whose time is valuable will appreciate this great saving. Again the use of the Type-Writer prevents pen paralysis, as both hands are used in its manipulation, while the position of the operator is not cramped nor strained. An impression prevails that in order to use a Type-Writer to advantage, it is necessary to have an expert or special person to work it, and that this would make an addition to the number of employees. The Type-Writer can be used by any person of ordinary ability, one or two hours a day, for a week, given to practice being all that is required to enable one to write as rapidly as with the pen. Your regular work after that time becomes your practice, so that after its use for a short while you will be surprised with what ease and rapidity it can be operated.

Between twenty-five and thirty thousand of these machines are now in use, and the demand is so great that the manufacturers are not able to fill their orders. It will pay any one to call and examine, if they have much writing to do. If not convenient to call, let us send you descriptive pamphlet, giving styles and prices and who use them, and in what estimation they are held by the largest firms and most prominent men in the country.
